PROFILE

I have a strong history working in the specialty coffee industry, mostly focused on the production side of operations for small companies. Working for companies with limited resources and small teams I found myself handling the e-commerce sites of many of the places I worked, this typically led to me maintaining the main sites as well. I recently decided to pursue web development more seriously and enrolled in a full stack development bootcamp. I'm looking forward to adding more skills to my repertoire and venturing deeper into the world of software development.

PROJECTS

SUPER HERO SEARCH

A group project using HTML, CSS(Bulma.io) and JavaScript(Jquery, giphy API, superheroAPI, and chart.js) to perform a search for super heroes and display some information and images of that hero in a page that is styled to resemble a comic book.
